

Summary

The Clinical Laboratory Technologist position is responsible for performing laboratory testing of blood and plasma samples using various molecular techniques including nucleic acid extraction, amplification, and quantification. This position also plays an integral role in the continuous improvement of quality systems within the laboratory. A successful candidate will have a strong background in molecular diagnostics and should be open to learning new techniques with expanded responsibilities as part of a flexible team.

The current openings are for 12-hour shifts, 3 days/week, Monday – Friday, 10:30 am – 11:00 pm.

Essential Duties & Responsibilities

- Perform accurate and efficient lab work
- Accession patient specimens and generate patient reports following established procedures
- Participate in cross-training and continuing education programs to improve technical skills and maintain an up-to-date knowledge of the field
- Monitor and record the acceptability of test results
- Perform instrument maintenance, troubleshooting, and quality control
- Assist in general laboratory maintenance including environmental monitoring, inventory management, and routine cleaning
- Complete required competency and proficiency testing
- Plan, record, and analyze experiments to aid in the development of laboratory developed test (LDT) offerings
- Follow guidelines necessary for regulatory compliance
- Work closely with supervisors and other employees
- Maintain a clear, concise, and consistent laboratory notebook
- Contribute ideas and feedback to improve laboratory processes
- A flexible schedule to perform off-shift work if required
- On-call availability

Education & Experience

- Bachelor's degree in Biological Sciences
- Minimum of four years of experience in a clinical laboratory
- At least two years of molecular testing
- Competency in various molecular techniques, including but not limited to, nucleic acid extraction, amplification and quantification
- Familiarity with the concepts of quality control (QC) and quality assurance (QA)
- Molecular Biology ASCP or equivalent certification preferred
- Physical ability to lift items overhead and stand for a significant portion of the workday is required
- Excellent communication and organizational skills
- Strong computer skills

Compensation

TAI Diagnostics provides competitive compensation and a comprehensive benefits package, with medical, dental, and vision coverage along with life and short-term and long-term disability. We also provide a retirement savings plan that combines 401(K) with a company match. Paid holidays and vacation round out the package. TAI Diagnostics is an Equal Opportunity employer.
